

# RAYMEDI Alerts 4

## Real Time SMS Updates for your Business

RayMedi Alerts is a real time business monitoring tool that helps to send/notify critical business information as mobile/E-mail/XML alerts from your business management software. Available as add-ons to RayMedi Retail and Distribution products, RayMedi Alerts can be integrated to work with any business management software available in the market today. RayMedi Alerts gives you the ability to automatically send notifications and alerts both internally (to employees) and externally (to suppliers, customers and other business partners)

### Key Features:

- Receive targeted, real time SMS/E-mail/XML alerts from your POS software.
- Send targeted SMS/E-mail alerts to your customers
- Get notified on daily business updates and summary
- Get instant notifications on Stock out, Low stock and Excess stock
- Send customer promotions, offers, greetings.
- Increase your security - get notified on failed login attempts, aborted login attempts...
- Alerts on exceptions like Bill cancellation, additional discount etc.,

### Key Business benefits:

- Improve sales and customer/supplier relationship
- Lower your investment, prevent losses and improve sales
- Prevent fraud, lower wastage and reduce your losses
- Save time on tracking and monitoring your business process, and focus on decision-making instead.
- Gain better control of your business with a complete overview of what's happening in your shop.
